

Dear all,

How have you been doing?

The days are growing longer day by day. ☺

It's getting much hotter here in Japan. Also the rainy season is near at hand.

Today, I will tell you about rainy season in Japan. ☺

"TSUYU"

We call the rainy season "Tsuyu", which literally means "plum rain", because it starts when plums are ripening. It starts from the southernmost tip of Japan in Okinawa at the beginning of May, and slowly moves north over the rest of Japan in June. But even though it is called the rainy season, it doesn't actually rain every day. ☺

One positive aspect of "Tsuyu" is hydrangea.

The hydrangea wet with the dew of the rain is strikingly beautiful, and a temple in Kyoto known as "hydrangea temple" is visited by many tourists.

Also at the end of "Tsuyu", we can see beautiful fireflies in the evening. (near rivers or rice fields)

Visiting Japan during this season is also recommended! ☺

HG BURRING TOOL

Realize to prevent slivers during the tap processing

1. You can upgrade the quality of your sheet metal products and show the difference from that of other companies.
2. It support without burr product requirements from consumer - electronics manufacturers or the like.
3. It can reduce human efforts used to remove slivers.

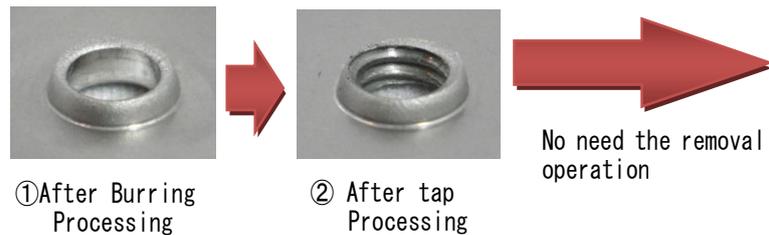

◆Specification

Direction	Upward	Downward
Size	1-1/4" (B)	
Pre-hole	Another processing (pre-processing)	
Material	Mild steel, Aluminum / Please contact us about Stainless	
Thickness	0.8 mm - 1.6 mm	0.8 mm - 2.3 mm
Die height	M3(34mm) M4 } outer spring type 34.5mm M6 }	30mm
Stock We can supply sizes out of stock	M3(inner diameter of burring φ2.6) M4(" φ3.4) M5(" φ4.3) M6(" φ5.1)
