

# NEWS

Dear all,

How are you doing?

It's early, and half of the year has passed. The time has passed really quickly. The rainy season started early this year, but we haven't announced when it will end. I want the rainy season to end soon, but after that, the heat wave is waiting, so I have mixed feelings. ☺

By the way, the Olympic Games are scheduled to be held from the 23rd of this month. And representative players from several countries have already entered Japan one after another. We hope that it will be a tournament that everyone can enjoy while firmly preventing Covid infection. ☺

## "Umi no Hi" (Marine day)

Marine Day is a holiday established in 1996 as Japan's 14th national holiday. Marine Day used to be called Umi-no-kinenbi (anniversary of the ocean) and held every July 20th.

It's a day for appreciating the benefits of the sea and wishing for the prosperity of Japan. Actually, Umi-no-kinenbi has been celebrated since 1941. Umi-no-kinenbi was established to celebrate that the Meiji Emperor returned safely by a steamship which is called the Meiji-Maru from Tohoku region to Yokohama in 1876. Initially, the ceremony was held every July 20th.

Originally held on July 20th, Marine Day is now celebrated every third Monday of July since the amendment of the National Holidays Law in 2003.

This is to guarantee a long weekend to help boost the economy due to the long weekend.

Beaches will open on July 1st in most prefectures.

Shops at the beach would sell various food and drinks like: ice cream, beer, curry, ramen and hamburgers.

It seems that there are anniversaries related to the sea, such as "Marine Day" not only in Japan but all over the world. ☺

# HG BURRING TOOL

Realize to prevent slivers during the tap processing

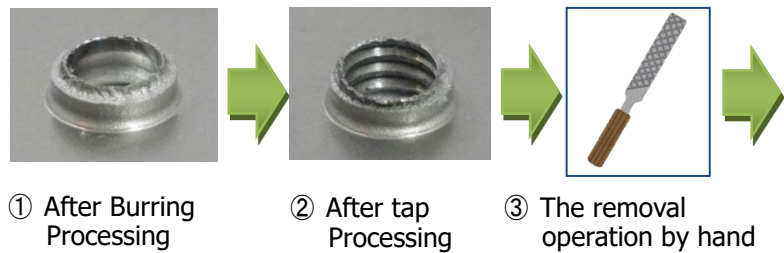

1. You can upgrade the quality of your sheet metal products and show the difference from that of other companies.
2. It support without burr product requirements from consumer - electronics manufacturers or the like.
