

ONE-TOUCH DIE HOLDER

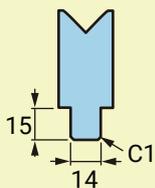

Manufacturer : Kyokko Corporation

- Can be placed and locked at any position, regardless of the length of the tool.
- Ideal for precision sheet metal working, as it prevents misalignment due to vibration or contact during operation, even with short dies.
- If the lever interferes, it can be removed.
- Can be used alongside traditional holders.
- Quick tool replacement leads to increased work efficiency.
- The conditions set at the time of alignment are retained and can be used without modification in the next and subsequent cycles.

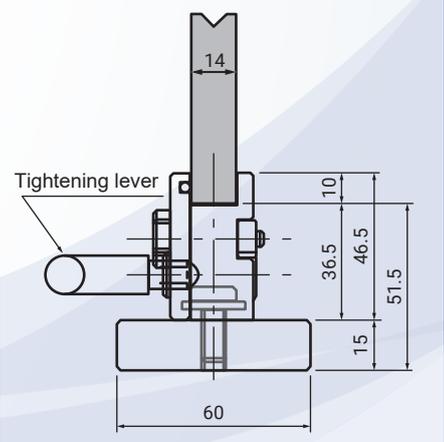

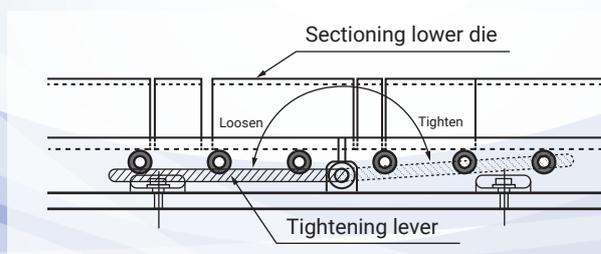

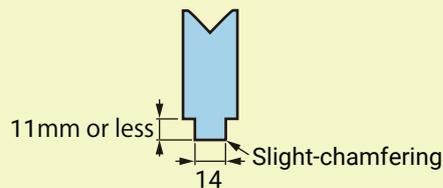

Depending on the shape of the die, there may be some that cannot be used.

○ Can be used
(Amada type)

✗ Cannot be used
(Komatsu type)
