

JAPAN TECHNOLOGY

We provide quick delivery, high quality and less price products to the customers.

Strong Points of Conic Press Brake Tools

High Quality & Technology For  The Future

CONIC

Since 1976 / Japan

Tool quality standards

1 Heat treatment

a Entire heat treatment

High quality heat treatment has been done.
Stable and accurate hardness is guaranteed.
HRC49-54

b Partially hardened heat treatment

Use high power heat source to apply heat treatment on bending edge partially.
The amount of wear of the EURO tool is 25% compared to the conventional tool when it is bent 12,600 times, and the wear difference from the conventional type tends to increase as the number of bends increases.
HRC54-60

Bending test

Stainless steel plate

1.0mm thickness

2 Quality control

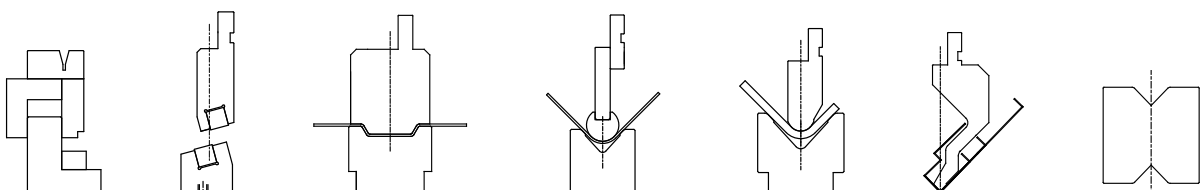

CONIC quality control is based on following standard

- ISO 9001
Our factory is managed on ISO 9001 standard.
- Quality control
Dimension, hardness, surface roughness, all of those conditions are controlled by experienced engineers, and our customers expect all CONIC tools as JAPAN quality.

Special tool specialist

- We keep drawings of special tools.
So it's easy to order repeatedly.

Correspondence ability

3 Mobile application for iOS and Android

Technologies for the Future

Details

*It may not be available depending on the area.

Everyone can download this application for free. When you requesting a quote, you will be freed from the troublesome work of requesting the purchase department from the factory and a mistake in communication. The administrator can easily approve by using the approval function of this system, and can use it without anxiety by having one authority to place an order. We recommend that you take this opportunity to download it to your mobile.
