

NEWS

Dear all,

How are you getting along these days? ☺

There is a difference in temperature between day and night, but the warm daytime makes you feel spring in Japan.

With warm sunshine, it was time to see small insects and flowers.

This is the year of the Tokyo Olympics and Paralympics! ☺

The event runs from July 24 to August 9.

The Tokyo Olympic Torch Relay will start from Fukushima Prefecture on the 26th of this month and travel around Japan.

(<https://tokyo2020.org/en/special/torch/olympic/>)

Do you know how many competitions are held at the Olympics and Paralympics?

There are 33 Olympic Games and 22 Paralympic Games.

In that, I will explain about "Judo", a sport that originated in Japan.

"Judo"

Judo was founded in 1882 by Mr. *Kano Jigoro*.

The origin of *Judo* is *Jiu-Jitsu*. *Judo* is a martial art that was newly established, aiming at nurturing personality, incorporating the original "*jiu-jitsu*" technique.

It was the wish of Mr. *Kano Shihan* to contribute to the development of society by completing oneself by training the mind and the body through practicing *Judo*". Although *judo* is an international sport today, it is still important to show courtesy. In fact, before and after the bout, the contestants bow to each other.

Judo rules

Judo is one of the Olympic martial arts that players, who are called *Judo-ka*,

fight one on one in a tournament. *Judo-ka* must wear a special uniform, called "*judogi*"

If you get a grip on the opponent's jacket called "*uwagi*", you will normally be

in the best position to dominate the fight. Each fight is up to 5 minutes for men and 4 minutes for women.

The fight will start with both players bowing to each other. The scoring system consists of 3 kinds of scores, namely "*ippon*", "*waza-ari*", and "*yuko*".

Watching sports with knowledge of sports rules is different from watching games without knowing it.

However, you don't need to know the detailed rules. It is OK if you understand the general rules. ☺

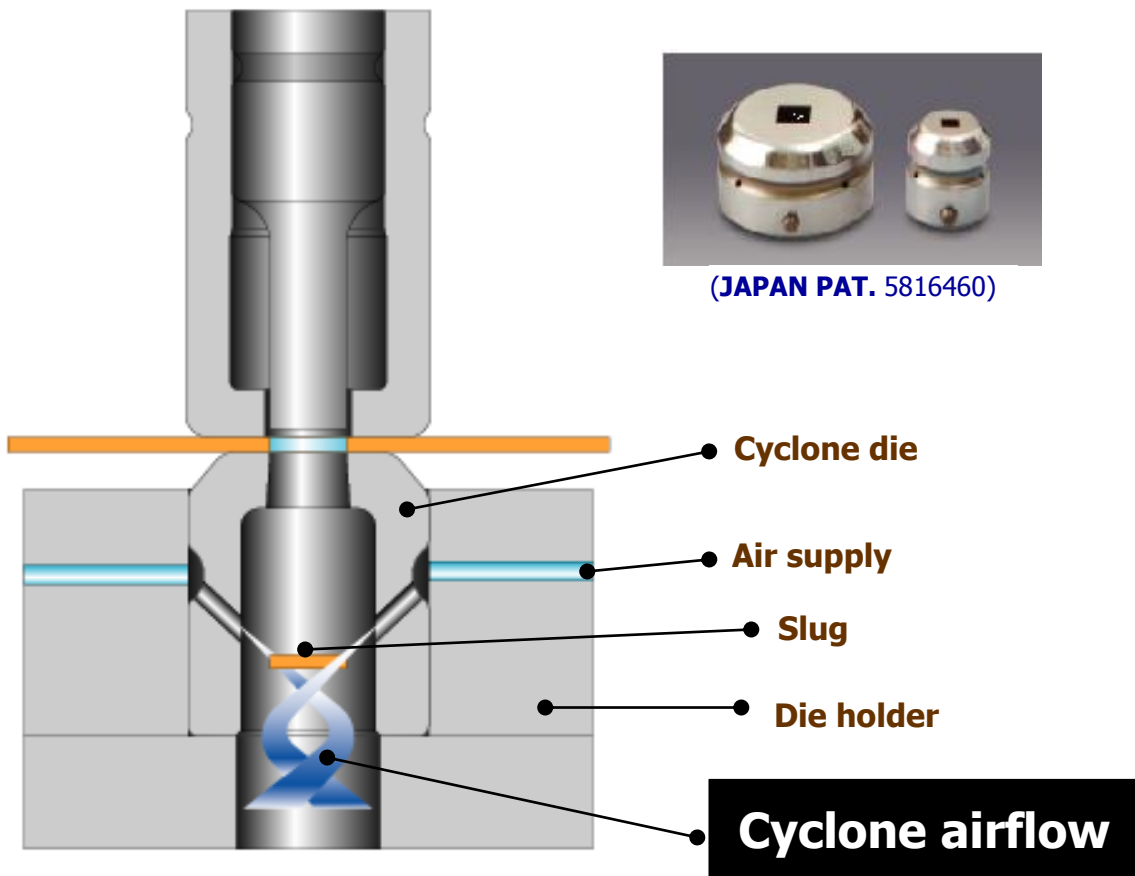

Anyway, let's have fun games!

Good for preventing slug pulling problems

CYCLONE DIE

Working only when punching machine has power vacuum die use function as machine option.

By adapting cyclone jet method, the slug pulling is removed by stronger cyclone (spiral) airflow.

To demonstrate the best performance for stable turret punch press processing.
