

Dear all,

I expect you are keeping well.

I can't wait for the end of the rainy season lately.

I've heard that this summer in Japan is extremely hot, but the temperature rises before the rainy season, and it's a day I can't do without an air conditioner.

Due to global warming these days, Japan has become like a subtropical climate.

The number of large typhoons and sudden heavy rains (It's called Guerrilla Rainstorm) is increasing.

Meanwhile, the number of people infected with COVID-19 in Japan is decreasing, and the economy is gradually recovering.

However, I still don't feel relieved, so everyone wears a mask to prevent infection.

Therefore, in the coming season, the mask will be full of heat and it will be necessary to be careful of heat stroke.

We hope that vaccines will be made soon and that days will come when the world will not have to worry about COVID-19. ☺

"YUKATA" (A Casual Cotton Kimono)

A *yukata* is a casual, single-layered cotton *kimono* which is usually worn in summer.

Yukata used to be worn as a kind of bathrobe when you took a bath with other people.

For this reason, some people used to avoid wearing it when they go out.

However, people started to wear *yukata* when they go to informal events such as summer festivals and firework displays in the *Edo* period.

So, we wear *yukatas* when we have traditional summer event such as *Bon-Odori* (*Bon* festival dance), fireworks and festivals.

We have a variety of fabric patterns for *Yukata*, such as flowers, fireworks, gold fishes or Japanese summer scenery.

Yukata is often worn with wooden sandals called *Geta*.

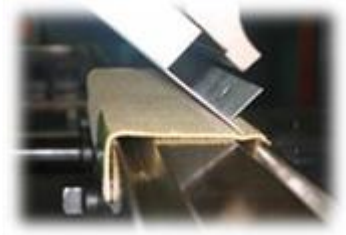

Recently, there are tourist spots where you can rent *yukata* and *kimono*.

You should try it when you come to Japan! ☺

NON SCRATCH PROTECTION SHEET

Are you satisfied with the bending scratches protection sheet you are currently using?
We have two types seat of "SPECIAL FIBER TYPE" and "RESIN MATERIAL TYPE", and
You can choose according to the bending process condition.

KIZU-NON SHEET (non-scratch protection sheet) & KIZU-NON SUPER (for thick plate)

Optimum material: Thick plate, Hard processing material such as SUS, etc.

High-tech and high-durability knitted fiber protects from bending scratches and has effects on wear and welding of the tools.

During processing, the fiber expands and contracts to a thickness of about 0.1~0.2 mm, it can be processed with the same tonnage as usual.

It is highly durable so it can be used many times and is economical.

KIZU-NON SHEET

Item No.	Thick (mm) x Wide (mm) x Long (m)	Correspondence thick plate (mm)
T-10	1.0 x 100 x 10	(SUS) T=0.5~1.5
T-05	1.0 x 100 x 5	(SPCC) T=0.5~3.2

KIZU-NON SUPER

Item No.	Thick (mm) x Wide (mm) x Long (m)	Correspondence thick plate (mm)
S-10	1.2 x 100 x 10	(SUS) T=0.8~6.0,
S-05	1.2 x 100 x 5	(SPCC) T=0.8~9.0

MOBIRON SHEET

Optimum material: mirror-finished SUS or AL, surface treated material.

This sheet made of special resin excels in oil resistance and durability.
It is inexpensive and can reduce costs.

Item No.	Thick (mm) x Wide (mm) x Long (m)	Correspondence thick plate (mm)
MF300T	0.3 x 200 x 10	(SUS) T= 1.5 or less
MF300TS	0.3 x 200 x 5	(SPCC) T= 1.6 or less
MF500T	0.5 x 200 x 10	(SUS) T= 2.0 or more
MF500TS	0.5 x 200 x 5	(SPCC) T= 2.3 or more

[CAUTION]

Currently, international transportation is taking much longer than usual due to the circumstances of the forwarder.

If you have an urgent order, please contact us as soon as possible.

*Please contact "tool sales desk" for pricing and details.

Do not hesitate to contact us if you have any questions.
