

**NEW**

**This stickers reduces marks on workpieces made by guide and stripper plate.**

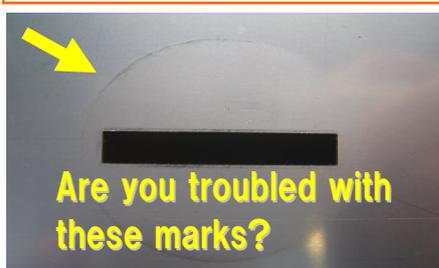

**~Mark-less sticker~**

Amada type (Thick Turret) Tooling / Trumpf type

High Quality & Technology For The Future

**CONIC**

**NEWS**

Mark-less sticker reduces marks on the surface of workpieces made by punch press tools and improves the quality of sheet metal processing. It is a special sticker and realized "easy sticking" and "Low cost". It is replaceable!!

- ① Oil and dirt on the surface on which a sticker will be put should be removed completely by thinner or the like.
- ② Peel off a sticker from the mount.
- ③ Put the sticker on the punch surface.
- ④ After putting the sticker.
- ⑤ After hitting a punch, this tool can be used. Also the sticker can be put after cutting into a hole shape by cutter.

By overlapping stickers, cushioning property can be increased.

**It is about time to replace the sticker with new one.**

Type	Size	Number of stickers per 1 sheet
Amada type (Thick Turret) Tooling	1/2"(A)	10 stickers
	1-1/4"(B)	10 stickers
	2"(C)	6 stickers
	3-1/2"(D)	2 stickers
	4-1/2"(E)	2 stickers
Trumpf type	I / II	6 stickers

< Caution > When using oil mist punch (air blow) of Amada type, please put the sticker trying not to block the air blowing holes.
