

High Quality & Technology For The Future
CONIC
NEWS

Mark-less sticker reduces marks on the surface of workpieces made by punch press tools and improves the quality of sheet metal processing. It is a special sticker and realized "easy sticking" and "Low cost". It is replaceable!!

① Oil and dirt on the surface on which a sticker will be put should be removed completely by thinner or the like.

② Peel off a sticker from the mount.

③ Put the sticker on the punch surface.

④ After putting the sticker.

⑤ After hitting a punch, this tool can be used. Also the sticker can be put after cutting into a hole shape by cutter.

By overlapping stickers, cushioning property can be increased.

Size	Number of stickers per 1 sheet
X	5 stickers
