

## METAL FORMING FAIR TOKYO (MF-TOKYO 2019)

# *Thank you all for coming!*

Dear Customer,

Thank you very much for visiting the Conic booth at "Metal Forming Fair Tokyo (MF-Tokyo2019)". At the venue, customers saw many new products and concept products that have condensed advanced technologies, such as "CEFH", "CST" and "EURO" which are high-hardness and long-life press brake tools.

We will propose tools and sheet metal machines that can reduce costs and maintain / improve quality and meeting customer's needs. We sincerely look forward to your patronage.

President Masako Okawa

### *HIGH-HARDNESS & LONG-LIFE Press Brake Tool Section*

We have introduced anew "High-Hardness Press Brake Tool" to the market about 5 years ago. The high-hardness press brake tool delivered at the beginning of the release was highly evaluated as "No need for re-grinding and will continue to be used in the future!" Here we have declared the start of a new era of high-hardness press brake tool!
